2D Spine Animator — Casino & Slot Games — Spine Rigging

guneet.social@gmail.com — +91 6393083589 — [Portfolio](#)

PROFESSIONAL SUMMARY

2D Spine Animator with around 3 years of experience creating production-ready animations for casino and slot games. Skilled in Spine rigging, character animation, UI animation, feature game animation, and asset optimization. Experienced in collaborating with artists, developers, and technical artists to deliver polished game experiences from concept to integration.

TECHNICAL SKILLS

Animation: Spine 2D • Character Animation • Character Rigging • UI Animation • Slot Game Animation • Feature Game Animation

Game Production: Asset Optimization • Production Pipelines • Game Asset Integration • Export Validation • Runtime Performance Optimization

Tools: Adobe After Effects • Adobe Photoshop • Cocos Creator

PROFESSIONAL EXPERIENCE

Ruby Seven Studios

Feb 2026 – Present

2D Spine Animator

- Served as the sole animator for a feature game involving dynamic object targeting and player-driven interactions.
- Create character, symbol, intro sequence, reward, and feature game animations using Spine 2D.
- Create UI animations for login calendars, VIP systems, rewards, promotional pop-ups, and feature game interfaces.
- Collaborate closely with technical artists and developers to validate exports and support game asset integration.
- Optimize Spine projects and production-ready assets to maintain efficient file sizes and runtime performance.

Probability Gaming

Aug 2024 – Feb 2026

2D Spine Animator

- Created production-ready slot game animations using Spine 2D for characters, symbols, UI elements, and feature assets.
- Rigged and animated game assets while applying animation principles suited for casino gameplay.
- Produced supporting animation effects using Adobe After Effects and Photoshop.
- Collaborated with artists and developers throughout the game art production pipeline.
- Adapted animations according to gameplay requirements, visual direction, and technical constraints.

Freelance 2D Animator

Aug 2023 – Dec 2024

- Delivered Spine 2D animation work for casino and slot game projects.
- Created character, symbol, feature game, and UI animations based on project requirements.
- Worked directly with clients and refined animations according to artistic and technical feedback.

SPINE & WORKFLOW PROJECTS

- Developed an internal WebP Skeleton Viewer with multi-animation previews and custom backgrounds, streamlining animation review and comparison workflows.
- Created advanced Spine rigs capable of smooth fake 3D rotations for enhanced visual presentation.
- Supported export validation and asset integration workflows in collaboration with developers and technical artists.

KEY ACHIEVEMENTS

- Completed full animation production for a slot game within seven days while maintaining quality and delivery standards.
- Improved animation review workflows through custom internal tooling.
- Created production-ready Spine assets optimized for casino and mobile game environments.

PORTFOLIO HIGHLIGHTS

- Production slot game animations including characters, symbols, rewards, UI elements, and feature assets.
- Spine character rigging with mesh deformation and optimized animation setups.
- Feature game animation systems prepared for developer handoff and integration.
- Advanced fake 3D rotation effects created inside Spine 2D.

EDUCATION

Bachelor of Computer Applications (BCA)

2021 – 2024
