

Guneet Singh

2D Animator – Spine 2D – iGaming & Casino Games

guneet.social@gmail.com – +91 6393083589 – [Portfolio](#) – [Work Samples](#) – [LinkedIn](#)

PROFESSIONAL SUMMARY

2D Animator with 3 years of experience creating polished, performance-optimised Spine animations for slot and casino games. Contributed to 50+ projects involving character animation, skeletal rigging, slot symbols, UI transitions, real-time VFX, and interactive features. Experienced in game-ready asset preparation, export validation, implementation troubleshooting, and mobile and web production pipelines.

TECHNICAL SKILLS

Animation: Spine 2D, Character Animation, Idle Loops, Character Reactions, Skeletal Rigging, Mesh Deformation, Slot Symbols, UI Animation, Feature Games, 2.5D Motion

Game Art & VFX: In-Game VFX, Win and Bonus Effects, Player Feedback, Background and Promotional Animation

Production: Game-Ready Assets, Export Validation, Asset Optimisation, Runtime Performance, Animation Troubleshooting, Developer Handoff

Tools: Spine 2D, Adobe Photoshop, Adobe After Effects – **Learning:** Cocos Creator

PROFESSIONAL EXPERIENCE

Ruby Seven Studios

Feb 2026 – Present

2D Spine Animator

- Created Spine animations for Delaware North and Ruby Seven Studios social casino products, including Ember Jackpot Casino, Lucky North Casino, Lucky Loonie Jackpots, and Fantasy Springs Slots.
- Animated characters, idle loops, win and feedback reactions, slot symbols, backgrounds, rewards, UI transitions, feature games, and interactive assets.
- Took ownership of animation delivery for an interactive feature involving dynamic object targeting, player-driven actions, responsive feedback, and multiple animation states.
- Produced UI motion and VFX for login calendars, VIP systems, reward flows, promotional pop-ups, bonus moments, and feature interfaces.
- Prepared and validated optimised Spine exports while collaborating with artists, developers, and technical artists to resolve integration and performance issues.

Probability Gaming

Aug 2024 – Feb 2026

2D Spine Animator

- Created production-ready Spine animations for casino game characters, slot symbols, backgrounds, UI elements, win states, and bonus feature assets.
- Built skeletal rigs with structured bone hierarchies, mesh deformation, reusable animation systems, and clean project organisation.
- Applied anticipation, timing, squash and stretch, secondary motion, and VFX to create polished and responsive player feedback.
- Prepared layered assets in Photoshop and After Effects, optimised animations for mobile performance, and delivered implementation-ready exports.

Freelance 2D Animator

Aug 2023 – Dec 2024

- Delivered Spine rigging and animation for casino and slot game characters, symbols, UI, backgrounds, VFX, and feature sequences.
- Independently managed technical preparation, client feedback, revisions, organised project files, and final game-ready delivery.

SELECTED PROJECTS & ACHIEVEMENTS

- Contributed animation work to 50+ slot, blackjack, poker, and casino-style game projects.
- Developed an internal WebP Skeleton Viewer with multi-animation previews and custom backgrounds, improving animation review workflows.
- Built a Spine-to-Cocos conversion tool that converts Spine animation data into editable native Cocos assets for faster implementation and iteration.
- Created advanced Spine rigs with simulated 3D-style rotations and completed full animation production for a slot game within seven days.

EDUCATION

Bachelor of Computer Applications (BCA)

2021 – 2024
