

Guneet Singh

2D Spine Animator — Casino & Slot Games — Spine Rigging
guneet.social@gmail.com — +91 6393083589 — [Portfolio](#)

PROFESSIONAL SUMMARY

2D Spine Animator with around 3 years of casino and iGaming experience, contributing to 50+ slot, blackjack, and poker-style game projects. Skilled in production-ready Spine rigs, character animation, slot symbol animation, UI motion, feature game animation, VFX polish, export validation, and optimized game-ready assets. Experienced in working with artists and developers to deliver clean, polished animations from concept to in-game implementation.

TECHNICAL SKILLS

Animation: Character Animation, Character Rigging, Slot Symbol Animation, UI Animation, Feature Game Animation, 2.5D Spine Motion

Game Production: Game-Ready Exports, Asset Optimization, Export Validation, Runtime Performance Optimization, Production Pipelines

Tools: Spine 2D, Adobe After Effects, Adobe Photoshop, Cocos Creator

PROFESSIONAL EXPERIENCE

Ruby Seven Studios

Feb 2026 – Present

2D Spine Animator

- Created production-ready Spine 2D animations for Delaware North / Ruby Seven Studios social casino products, including Ember Jackpot Casino / Lucky North Casino, Lucky Loonie Jackpots, and Fantasy Springs Slots.
- Served as the sole animator for a feature game involving dynamic object targeting and player-driven interactions.
- Create Spine animations for characters, slot symbols, intro sequences, rewards, feature games, and interactive game elements.
- Animate UI elements for login calendars, VIP systems, reward flows, promotional pop-ups, and feature game interfaces.
- Prepare optimized Spine exports and game-ready assets for developer handoff, implementation, and runtime performance.
- Collaborate with artists, developers, and technical artists to validate animation behavior, export quality, and in-game presentation.

Probability Gaming

Aug 2024 – Feb 2026

2D Spine Animator

- Created production-ready Spine 2D animations for slot game characters, symbols, UI elements, and feature assets.
- Rigged and animated 2D game assets using mesh deformation, timing, anticipation, squash and stretch, and secondary motion.
- Produced supporting animation effects and polished visual elements using Adobe After Effects and Photoshop.
- Adapted animations based on gameplay requirements, visual direction, and technical limitations.
- Collaborated with artists and developers across the casino game art production pipeline.

Freelance 2D Animator

Aug 2023 – Dec 2024

- Delivered Spine 2D animation work for casino and slot game projects.
- Created character, symbol, feature game, and UI animations based on client requirements.
- Refined animations according to artistic feedback, gameplay needs, and production constraints.

SPINE PROJECTS & ACHIEVEMENTS

- Developed an internal WebP Skeleton Viewer with multi-animation previews and custom backgrounds, improving animation review and comparison workflows.
- Created advanced Spine rigs with smooth simulated 3D-style rotations for enhanced slot symbol and character presentation.
- Completed full animation production for a slot game within seven days while maintaining quality and delivery standards.
- Built optimized Spine animation setups prepared for clean export, developer handoff, and runtime use.

PORTFOLIO WORK SCOPE

- Slot game animation work covering character performances, symbols, rewards, bonus features, UI transitions, and promotional game elements.
- Spine rigging work including mesh setup, bone hierarchy, deformation control, reusable animation structure, and export-ready organization.
- Animation delivery focused on clean timelines, polished motion, optimized assets, and developer-friendly handoff.

EDUCATION

Bachelor of Computer Applications (BCA)

2021 – 2024
